

Waste Oil Collection Facility

Waste Oil can be deposited free of charge during normal opening hours in Council's Waste Oil Recycling Facility (a 3,000 litre double walled tank complete with spill containment) at Council's Transfer Station, located on Pigeon Flat Road, Bordertown.

Oil must be in the original container.

The facility has the following features:

- Cleanable solids and sludge trap under removable heavy mesh floor for easy servicing.
- Accepts all size containers including 205 litre drums.
- Drum unloading hoist for 60 litre and 205 litre drums for safe unloading and compliance with WHS requirements.
- Anti-splash container, drainage area with fixed rack for 5 litre to 20 litre containers.
- 25 litre drums can be easily loaded and drained from small trucks, utes and 4WD's etc.
- Small containers can be poured through mesh top and then left on rack to drain completely.

The following conditions apply:

- For Waste Petroleum Oils Class 2 only
- No cooking oils or fat
- No brake fluid, coolants, solvents paints or any other chemicals whatsoever

This facility is funded by the Product Stewardship for Oil Program "An Australian Government Initiative".
